

Bag Silos

FARMING

Bag Silos are used for the storage of bulk materials such as, for example, grain, flour or pellets in buildings. The supporting frame is made from galvanized steel profiles and the bag from high-strength woven polyester fabric. The silos can not only be filled pneumatically with a filling pipe but can also be filled mechanically by other conveying equipment.

All advantages at a glance

- ✓ Ever constant feed quality
- ✓ Dust-free filling
- ✓ Optimum flow-out characteristics
- ✓ Little installation effort
- ✓ Low freight volume
- ✓ Robust flexibility
- ✓ A breathing silo so that no build up of condensation arises

Technical Data

Type	Dimensions, mm	Height, m	Volume, m ³
SG 1	1300 x 1300	2.50 – 6.04	1.9 – 2.6
SG 2	1600 x 1600	2.94	3.6
SG 3	1880 x 1880	3.35 – 4.85	5.8 – 9.7
SG 5	2260 x 2260	3.45	8
SG 6	2260 x 2260	4	10.8
SG 8	2260 x 2260	4.55	13
SG 10	2560 x 2560	4.84	17
SG 12	2600 x 2600	5.45	20.3
SG 15	2900 x 2900	6.17	28.7
SG 17	3110 x 3110	5.74	28.3
