

Outdoor Silos

FARMING

Outdoor Silos with funnels or flat bottoms are used for the storage of bulk materials such as, for example, grain flour or pellets in the open air. The funnel silos can be supplied with a discharge funnel of 45°, 60° or 66°. The roof has an angle of 30°. As standard the silos are supplied with a ladder, safety cage and rest platform, an access door, a roof ladder with handrail and an inspection cover. Additional accessories, such as ventilation systems with fans and roof exhaust hoods, catwalk structures, temperature control systems and sweep augers can also be offered. The silos are made from galvanized steel (450 or 600 g/m²).

All Advantages at a glance

- ✓ Large selection of silos
- ✓ Long operational life
- ✓ Quick and simple installation
